

Overview of Sports Premium Spending

Hayfield Primary 2015 - 2016

Given the huge success we had as a school in the School Sports Partnership in the previous academic year (2014 - 2015) we were keen to sustain our involvement. We committed to another years membership and accessed 95% of the cluster inter-school tournaments and qualified for many county finals. This was made possible by the continued employment of Natalie Mills who has become the Hayfield School Sports Coach. She trains the children prior to the events, plans and accompanies them on the day. We have had 100% of children at KS1 and 98% of children at KS2 attending at least one interschool tournament/festival, with many having the opportunity to attend multiple fixtures (including county finals). This has been a continued success again this year and has had a positive affect on pupil's fitness and self esteem.

Staff were keen to develop further OAA at Hayfield. Sue Brooks has continued to support staff in both Key Stages with exciting and challenging units of work in OAA using our wonderful locality. She has worked alongside staff and produced comprehensive lesson plans and resources to use in each unit. These are linked to the National Curriculum where appropriate. Sue was keen to ensure that staff had the support the first time that they completed the sessions but very much had a vision of her work being sustainable and that she should be able to step back from this role after this year and that staff would then have the confidence to continue. Both children and staff have benefited hugely from her involvement in this area and we now have a comprehensive range of resources to support OAA at Hayfield and Sue will continue to be available to support/advise staff in this area and is looking forward to seeing them leading these sessions themselves.

We have continued our work with Zoey Shaw from Little Learners as a source of CPD for staff in fundamental skills. Zoey has worked with all children in school throughout the course of the year focussing on fundamentals, invasion games, netwall and athletics and all teaching staff and many TAs have had the opportunity to work alongside her. She has worked in partnership with staff on the new assessment grids and has tailored her teaching accordingly to allow

staff to have ongoing assessment opportunities. Zoey's work has also extended to an after school club exclusively for EYFS & KS1. Uptake has been encouraging and many parents (and staff) have commented on the quality of the provision that she provides.

In February we hosted a cluster training session on 'Fitness Through PE'. All teaching staff, and many TAs, had the opportunity to attend this training. We worked with the provider on identifying ways we could incorporate fitness into everyday life at Hayfield and also planning specifically for fitness in our PE lessons. As a result many classes decided to incorporate a daily run into their school day and noticed a distinct improvement in behaviour, motivation, fitness and enthusiasm of the children. All staff have now incorporated the teaching of fitness into their PE lessons.

Five children from KS2 were selected to take part in an 'Inspire Physical Activity' programme run by High Peak Sports Partnership. They took part in two full day OAA sessions at White Hall and received training and support on identifying goals and recognising the steps they needed to get there. They examined the British Cycling training model and how this could be adapted to their own goals. The children identified a wide range of goals and have since led football sessions for KS1 children and set up Dance Clubs for KS1 children. They also started to look at growth mindset and this is an area that we have identified as wanting to develop further in 2016 - 2017. The Olympic Values being central to this.

Staff created a wish list of resources that they felt would make delivering PE more effective. Light weight mats had featured on this list for a long time and due to the cost of replacing the existing mats we knew that this would take some time. In partnership with Hayfield PTA and the Mums & Tots group that use our school hall we pledged some of our resources budget to this. Staff are now able to get the children to be more independent in setting up for a PE lesson and are accessing more of the curriculum as a result of this.

We evaluated our annual Sports Day at Hayfield and, in consultation with our Sports Captains, decided that we would like to add a new dimension to the day.

It was decided that would employ an OAA company to run workshops throughout the day for each class as part of the carousel of activities. The Sports Captains planned and carried a Fun Run to raise some funding for this event and we matched this. This provided another dimension to Hayfield School Sports Day and enabled all children to access the event. There was lots of teamwork involved but less pressure on the children who find the competitive element of sports day intimidating. We had 100% participation in this activity from all children in KS1 & KS2. We will run a similar event next year at Sports Day but keep in 'in house' now that we have the format of the day.

This has been another incredibly successful year at Hayfield Primary School thanks to the funding from the Sports Premium Funding and a committed PE working party. The staff at Hayfield are embracing PE and the opportunities that it can offer the children and the impact that this has on many other areas of their school life.
